## Education

|                                                                          |                                         |
|--------------------------------------------------------------------------|-----------------------------------------|
| <b>Hangzhou Dianzi University</b><br>B.ENG. IN COMMUNICATION ENGINEERING | <i>Hangzhou, China</i><br>2023 – 2027   |
| <b>The University of Sydney</b><br>SUMMER SCHOOL                         | <i>Sydney, Australia</i><br>Summer 2024 |

## Research Interests

**Core Research Interests:** Computational photography, 3D computer vision, and world models. Recovering usable visual signal from imperfect real-world capture, and building geometry-grounded spatial representations that can predict the world.

**Core research question:** How can we recover high-fidelity structure from degraded observations (sensors, codecs, sparse views) and turn it into predictive spatial world models?

## Honors and Awards

|           |                                                             |                          |
|-----------|-------------------------------------------------------------|--------------------------|
| 2024      | <b>Sydney Summer School — Excellent in both assessments</b> | <i>Sydney, Australia</i> |
| 2023–2027 | <b>Top 10% in major, Hangzhou Dianzi University</b>         | <i>Hangzhou, China</i>   |

## Publications

\*Equal contribution.

### PREPRINTS

[P1] X. Wang, J. Zhang, X. Yu, L. Lei, and D. C. Zhang. HyperClaim: Fine-Grained Cross-Modal Hypergraph Reasoning for Video Misinformation Detection. Submitted, 2026. [Paper]

### CONFERENCE PROCEEDINGS

- [C2] X. Feng\*, X. Wang\*, T. Zhong, C. Wang, Y. Zhao, T. Xu, Z. Kuang, F. Qin, X. Yin, and Y. Zhu. SR3R: Rethinking Super-Resolution 3D Reconstruction With Feed-Forward Gaussian Splatting. CVPR, 2026. [Paper]
- [C1] X. Wang, W. Jiang, J. Wang, Y. You, S. Fang, and F. Wen. SwitchCodec: Adaptive Residual-Expert Sparse Quantization for High-Fidelity Neural Audio Coding. ICASSP, 2026 (Oral). [Paper]

## Research Experience

|                                                                                          |                                                         |
|------------------------------------------------------------------------------------------|---------------------------------------------------------|
| <b>RAWLab, HKUST (Guangzhou)</b><br>RESEARCH ASSISTANT, ADVISED BY ZITENG CUI            | <i>Guangzhou, China</i><br>Jul. 2026 – Present          |
| • Research Topics: computational photography, imaging under real-world degradation.      |                                                         |
| <b>University of Sheffield</b><br>RESEARCH ASSISTANT, ADVISED BY DELVIN CE ZHANG         | <i>Sheffield, United Kingdom</i><br>Mar. 2026 – Present |
| • Research Topics: video misinformation detection, cross-modal hypergraph reasoning.     |                                                         |
| <b>MILab, Hangzhou Dianzi University</b><br>MEMBER, ADVISED BY ZHENZHONG KUANG           | <i>Hangzhou, China</i><br>2025 – Present                |
| • Research Topics: feed-forward Gaussian Splatting, super-resolution 3D reconstruction.  |                                                         |
| <b>I IPL, Hangzhou Dianzi University</b><br>MEMBER, ADVISED BY WENBIN JIANG AND JIN WANG | <i>Hangzhou, China</i><br>2024 – Present                |
| • Research Topics: neural audio coding, residual-expert vector quantization.             |                                                         |
